In this highly interconnected market, mobile devices are under constant cyber-attacks, compromising business-critical data. Your organization is threatened by an increasing number of risks which make it imperative that you keep up with them and protect your organization. Security and risk management leaders must familiarize themselves with mobile defense solutions and plan to gradually integrate them to mitigate mobile risks.

We, at Staxx Solutions, provide our customers and partners with the best of breed in technology solutions which help to deliver cost-effective and essential security solutions for business. Formed in June 2017, Staxx has developed a wide network of channel partners, covering 43 countries in Middle East and Africa.

Our solutions can also be offered via Mobile Operators to consumers and commercial customers, affording them an additional source of revenue, with a significant value added solution of security. There are over 1.2 billion mobile devices in use throughout MEA. Our goal, as a distributor, is to provide focused and targeted cyber-security solutions to those devices.

ZIMPERIUM.
MOBILE THREAT DEFENSE

MobileIron

KOOLSPAN

The Zimperium Mobile Threat Defense (MTD) platform provides real-time, on-device protection against the broadest set of Android and iOS device, network and app attacks without the delays and man-in-the-middle bypass risks of cloud-based detection solutions. To date, Zimperium's machine learning-based engine, z9, has detected 100% of zero-day mobile exploits without requiring an update--something no other MTD solution can claim. Leading MTD solutions address device, network and application level threats on iOS and Android platforms. Our product, Zimperium, employs machine learning and AI on-device technology to detect and mitigate attacks to include Zero-day attacks.

MobileIron enterprise mobility management (EMM) enables your employees to enjoy seamless access to business apps and data through secure mobile devices, desktops, and cloud services while still maintaining complete control over their privacy. This is made possible via the combination of three underlying technologies:
• Mobile Device Management
• Mobile Application Management
• Mobile Content Management
We firmly believe that the products we have selected represent the best of breed, are cost effective, offer both Cloud and on-prem options and are easy to use.

Attacks on mobile communications are growing, targeting people and companies of all sizes and industries: government employees, international business executives and others.

KoolSpan's secure mobile communication solutions enable high quality secure phone calls and text messaging with an application that is easy to install, manage and use. KoolSpan is the only provider of secure communications solutions that seamlessly operate across device types, networks and operating systems, and provides interoperable solutions leveraging device's native secure elements as well as common criteria certified hardware.
